SUMMARY

Passionate AI/Machine Learning Engineer with a strong foundation in deep learning, computer vision, and natural language processing, and agentic workflows. I aspire to be part of something large-scale with a positive impact.

TECHNICAL SKILLS

- Programming Languages:** Python, typescript, SQL,
- Frameworks:** TensorFlow, PyTorch, TensorFlow, langgraph, ReactJS, NextJS
- Libraries & Tools:** OpenCV, NLTK, Git, Docker, AWS, Google Cloud

NOTABLE PROJECTS

- AI Calendar Assistant**
Startup Company, Agentic AI
 - created calendar website with personal assistant to manage schedules
 - used langraph to maintain agentic workflow for assitant and created CRUD API's for data
 - Calendar App

Jan 2025 – present
NextJS, SQL, TypeScript, LanggraphJS
- Image Resolution Enhancer**
Deep Learning Project
 - Developed an end-to-end system for enhancing resolution of images by 4x pixels
 - Achieved state-of-the-art performance on DIV2K dataset

Jun 2024 – Aug 2024
Python, Pytorch, OpenCV
- AI Chess and Tic Tac Toe**
Graph Theory
 - Used a n-ary tree structure and minimax algorithm to search for optimal moves
 - used pygame to make the AI playable in a GUI

Jan 2024 – Feb 2024
Python, pygame

For more projects, check out my GitHub: github.com/sujen07

EXPERIENCE

- AI/ML intern - Post Silicon Validation**
AMD
 - Implemented ML algorithms to identify likely error producing regression testing workloads
 - Started agentic workflows to assist with debugging
 - created various automation scripts to reduce manual effort in validation

Jan 2025 – present
Folsom, United States
- AI Graduate Researcher**
UCSD ARCLab
 - Deployed Reinforcement Learning algorithms to perform human tissue cutting
 - Used robomimic framework in isaac-sim to train reinforcement learning model for robot to cut tissue

Jul 2024 – December 2024
La Jolla, CA
- Data Science Intern**
Omnisync INC
 - developped an end-to-end pipeline for a semantic search query
 - used REST APIs to pull and maintain over 7 million rows of data
 - used text embeddings and vector search to enable semantic searching

Jan 2023 – June 2023
La Jolla, United States
- Data Analytics Intern – Graphics Performance and Power**
Intel
 - automated performance testing for data center graphics cards
 - used bash scripting and python and outputted performance and power metrics data
 - performed data analysis on GPU temperature/performance data on a variety of workloads

June 2022 – Sep 2022
Folsom, United States

EDUCATION

- University of California, San Diego**
M.S. in Machine Learning, Electrical Engineering

La Jolla, CA
Sep 2024 – Jun 2026
- University of California, San Diego**
B.S. in Data Science

La Jolla, CA
Sep 2021 – June 2024

PUBLICATIONS

- Avoiding Decision Fatigue with AI-Assisted Decision-Making
